Cat Statue

If you want to take your garden or outdoor space beyond ordinary ornamental plants, this bronze-look cat statue offers exactly the uniqueness you are looking for. Reflecting the posture, fur texture, and expression of a real cat, this work evokes instant wonder and admiration in everyone who steps into your garden. With its tail held high and looking forward, it claims your space with a confident and noble stance. This statue, crafted with enough detail to be mistaken for a real cat from a distance, offers an option far beyond the usual in garden decoration.

Durable Fiberglass Material

The sculpture is produced using high quality fiberglass material, specifically preferred for outdoor use. Fiberglass is extremely resistant to weather conditions such as rain, sun, frost, and humidity; it does not show cracking or deterioration over time. While the bronze patina coated surface perfectly mimics the look of a real bronze statue, it maintains the lightness and longevity of the material. With a weight of approximately 25 kilograms, the statue has a solid and balanced structure and does not move even in windy weather. It leaves a permanent mark in your garden with its color that does not fade and its texture that does not deteriorate over the years.

Realistic Craftsmanship and Detail

The most important feature that distinguishes this statue from an ordinary garden ornament is the quality of craftsmanship in its production. Every fur mark, every claw detail, and facial expression has been meticulously processed; as a result, a work of artistic value has emerged that gives the impression of a living cat. The upright and curved posture of the tail reflects the confident and curious character of the animal. With dimensions close to real sizes, it adds a sense of true vitality

to the space when standing in the garden, on the terrace, by the pool, or at the entrance path. It also creates a very impressive background element for photo shoots.

Special Design for Garden and Outdoor Use

The statue is designed specifically considering garden and outdoor use. Its base is kept flat and wide, allowing it to stand balanced on grass, stone paving, concrete, or wooden surfaces. You can fix it to the ground if you wish, or move it to different spots according to the season. Thanks to its 25-kilogram weight, it is not burdensome to carry, yet the risk of tipping over in a possible wind is extremely low. When placed at the garden entrance, by the flower bed, or at the foot of a tree, it achieves a natural harmony and looks as if it belongs there.

Completely Custom Order

This statue is not a standard shelf product; each one is produced individually as a custom-made order. The color tone, size, and surface coating details can be customized upon request. Those who want to prefer a different color instead of bronze patina or those who request a scale outside the standard size can convey these requests during the ordering stage. These works, each processed individually by artisan hands, are not exact copies of each other due to the nature of the production process. The statue you receive will be a truly unique and original work.

To Order

To bring this special cat statue to your garden or outdoor space and to convey your color and size preferences, you can use the order form below. Once your order is received, the production process begins, and when completed, it is delivered to your address carefully packaged.
