# Big Square Atatürk Statue

Large Square Ataturk Statue is a full-size monumental statue prepared in memory of Mustafa Kemal Ataturk, the founder of the Republic of Turkiye, with the aim of conveying respect and reverence for his legacy to future generations. Taking its place as an honorable symbol in squares, public institutions, municipal buildings, and city centers, this statue strikingly reflects Ataturk's strong stance, leadership qualities, and commitment to the values of the Republic. With its realistic facial expression and upright, determined posture, it adds grandeur and meaning to the square where it is located.

Features of the Statue

The Large Square Ataturk Statue is custom-made from high-quality fiberglass, which is resistant to outdoor conditions. By expertly crafting the facial features, hair details, clothing texture, and hand gestures, Ataturk's characteristic appearance is reflected as realistically as possible. Designed in full-size dimensions, the statue is offered with custom production options in different sizes suitable for the scale of the square. Fixed onto a pedestal, the statue is displayed in the square with dignity for many years without losing its color or form, thanks to its special weather-resistant coatings.

Usage Areas

The Large Square Ataturk Statue is primarily designed for use in city squares, in front of municipal buildings, governorate and district governorate buildings, school yards, and the open areas of public institutions. It stands out as a central symbol during official celebrations held in republic squares, memorial parks, and ceremonial areas. It is also a meaningful option for university campuses, cultural centers, and Ataturk memorial parks. It is an ideal product for municipalities

and institutions that wish to strongly express their commitment to republican values in public squares.
