

Grey Wolf Sculpture

The grey wolf is one of the most deeply rooted symbols of Turkish culture and history. This special grey wolf sculpture, with its howling posture and bronze coating, presents a powerful aesthetic stance in both indoor and outdoor spaces. Rising on a stone base, this impressive piece can be used in many different settings, from garden arrangements to corporate areas. Not just a wolf sculpture, but a symbol of power and freedom from the depths of history.

Features of the Sculpture

This grey wolf sculpture, produced with high-quality fiberglass and bronze coating technique, is extremely resistant to outdoor weather conditions, sunlight and seasonal changes. The figure, designed in a howling posture, offers a realistic appearance with feather and muscle details crafted down to the finest detail. The sculpture, which can be produced in small and large size options, can be ordered in different dimensions according to space requirements. Its base, designed with a stone texture, adds a natural and monumental appearance to the piece.

Areas of Use

The grey wolf sculpture is an ideal choice for garden and landscape arrangements, and is also frequently preferred for residential entrances, villa gardens, corporate buildings and public areas. While the large wolf sculpture creates a monumental effect, the small size option is also suitable for indoor decoration and desktop use. Grey wolf sculpture prices are determined according to size, material and coating preference. You can contact us to receive a custom price quote for your project.
