

Horse Statue

The horse statue is the most pure expression of power, freedom and nobility. The horse, an indispensable symbol of civilizations throughout history, has always held a special place in the art of sculpture. With its rearing posture, this horse statue is an impressive work that brings together victory, power and dynamism in a single form. The dark, deep tone it gains with its bronze patina coating offers a timeless aesthetic to the statue while the fine muscle details and flowing mane craftsmanship are the finest indicators of mastery.

Features of the Statue

The horse statues, produced from fiberglass material, has both a lightweight and extremely durable structure. The statue, which gains a real bronze appearance with its bronze patina coating, is resistant to moisture, UV rays and temperature changes. The dynamic posture that draws attention with its rearing position has come to life with the meticulous crafting of muscles and mane details. The statue, which can be produced in different size options, is equally suitable for both indoor and outdoor use.

Areas of Use

The horse statue is frequently preferred in villa gardens, hotel entrances, municipal squares, shopping mall entrances and the exteriors of corporate buildings. This statue, which naturally adapts to any space seeking power and prestige, enriches the area it occupies both aesthetically and in terms of meaning. It can be used alone or create an impressive visual effect with a symmetrical double placement.
