

Kazim Karabekir Statue

The Kazim Karabekir statue is an original work of art that brings a great commander to the center of your institution or living space, a leader who won major victories on the Eastern Front of the Turkish War of Independence and freed Kars and its surroundings from Armenian occupation. Kazim Karabekir Pasha, who played a key role in organizing the Erzurum Congress and the National Struggle in Eastern Anatolia, secured the liberation of Kars and wrote his name into history in golden letters. This figure, holding a special place in the national memory with his determined posture and commanding identity, is brought to life in this statue down to the finest detail.

Statue Features

Made from high quality fiberglass material, the Kazim Karabekir statue offers both historical depth and strong aesthetics with bronze effect coating options. The commander's kalpak hat, coat, buttons, and posture have been modeled with the highest level of resemblance, staying true to historical photographs and documents from the era. The realism in the facial features and the authoritative expression in his gaze make anyone who sees the statue feel they are looking at a familiar commander. Thanks to its fiberglass material, the piece is resistant to both indoor and outdoor conditions and retains its shape and color for many years. The mounting system is applied with custom measurements for each location.

Where to Use This Statue

The Kazim Karabekir statue carries deep meaning especially for municipalities, governorships, schools, universities, museums, military barracks, and private collections in our eastern provinces.

Placed at the entrance, square, or memorial area of institutions that want to keep alive the liberation struggle of Eastern Anatolia, particularly Kars and Erzurum, this piece leaves a lasting and powerful first impression on visitors. It creates a meaningful focal point for national holidays, liberation anniversaries, and commemoration ceremonies. Custom size, pose, and coating color options allow for project based production.
