New Statues: Large Fiberglass Works From Our Workshop

Every new sculpture is a journey that moves with dedication, from the moment an idea takes shape in clay to the day it is delivered. In this video, we share the sculptures we recently completed in our workshop. At Heykel.org, we produce every work with great care down to the finest details, and we closely follow every stage, from size to surface finishing. If you are thinking about ordering a custom sculpture, the Contact Us menu at the bottom right will guide you step by step.

Saber-Toothed Tiger, Justice and Gazi Osman Pasha Statues

The first work featured in the video is the saber-toothed tiger sculpture. This figure, which stands out with its powerful stance and striking expression, was produced as a large fiberglass statue. The justice statue holding scales has a dignified look that suits courthouses as well as corporate spaces. In the Gazi Osman Pasha statue, the character of the historical figure, the facial features and the clothing details were crafted with great precision. Each of these large scale works is durable enough to be used for many years in both outdoor and indoor areas.

Large Ataturk Wall Portrait and Cartoon Character Statues

The large Ataturk wall portrait prepared in our workshop stands out as a meaningful and lasting piece for schools, institutions and public spaces. The expression of the portrait and the depth of the relief were skillfully worked. The cartoon character sculptures, loved by children, add color to parks, gardens, playgrounds and entertainment venues. With their vivid colors and large size, these figures become attractions that visitors notice at first glance. You can explore our wide range of

sculpture categories to see the works we have produced before.

Clay to Mold to Fiberglass Casting: How Statues Are Made

Every sculpture of ours is first shaped by hand in clay. Once the form, proportions and details are perfected in clay, a mold is taken and the fiberglass casting stage begins. This method makes the sculpture lightweight, durable and strong against weather conditions. To learn more about our production process and our approach, you can visit our about us page. You can find answers to all your questions about materials, size and delivery in our sculpture guide.

Custom Sculpture Maker: We Can Make Any Figure You Want

From animal figures to portraits, from historical figures to cartoon characters, we can make a sculpture of any figure you want. No matter how special your idea is, we can refine it together and turn it into a lasting work of art. Tell us your idea and leave the rest to the experience of our workshop. You can contact us right away to order a custom sculpture.
