Sculpture Factory

We deliver custom design and serial sculpture production across Turkey. From municipalities to the private sector, from shopping malls to parks, we deliver every order on time and at the highest quality. With decades of experience and our extensive production capacity, we are Turkey's leading sculpture manufacturer.

Dozens of projects progress simultaneously in our factory. Each one is handled by a dedicated team and meticulously tracked from clay model to mold making, from casting to surface painting. We are by our customers' side at every step to turn their dream piece into reality.

Polyester, Fiberglass and Bronze Sculpture Production

We use polyester resin, fiberglass, concrete and metal skeleton systems in our production. Each material is selected based on the sculpture's intended environment and durability requirements. Lightweight polyester is preferred for interiors, while fiberglass and bronze are the top choices for outdoor use due to their resistance to weather conditions.

In the coating phase, we work with acrylic paints, epoxy coatings and special effect paints. Bronze patina, gold leaf and matte-gloss combinations every surface treatment is carried out within our own facility. Without any dependency on outside suppliers, we manage the entire process from design to delivery under one roof.

Municipal and Corporate Sculpture Orders

We have completed hundreds of projects for municipalities, universities, shopping malls and

private companies across Turkey. The works we have delivered to public spaces range from park figures to town square monuments, from decorative animal sculptures to corporate logo objects. Every project is designed from scratch to match the spirit of its setting and the expectations of our client.

Among the most frequently ordered items in corporate commissions are animal figures, human busts, themed park sculptures and decorative objects reflecting brand identity. With our short delivery times and competitive pricing, we help you become the owner of a quality piece without straining your budget.

Custom Design Sculpture Orders

All it takes is telling us what you have in mind. Whether it is a rough sketch, a reference photo or just an idea, our design team will turn it into a tangible work. We offer full flexibility on size, material, color and detail. We produce custom pieces at every scale, from a small desk object to a monumental landmark.

Throughout the custom order process, we stay in constant contact with the client. We get approval at the model stage, share photos and videos during production, and provide installation support after delivery. Making sure the sculpture is placed in the right spot, in the right way, is part of the job for us.

Why heykel.org?

We have been working for years to become the first name that comes to mind in sculpture production in Turkey. Our extensive production facility, experienced team and the thousands of pieces we have delivered have made us the trusted address of the industry. We never compromise on quality, and we never waver from our commitment to on-time delivery and competitive pricing.

Whether your project is small or large, reach out to us. We are with you at every step from the first consultation to delivery. As Turkey's sculpture factory, we are ready to produce the finest piece for you as well.
