

Sculpture Manufacturing Companies

Finding the right company for individuals, institutions and municipalities who want to have a sculpture made in Turkey is the most critical step of the process. Choosing a company among sculpture manufacturing companies that offers quality craftsmanship, material assurance and on-time delivery is of great importance both financially and emotionally. With the expertise we have gained over the years and hundreds of completed projects, we are among the leading sculpture manufacturers in Turkey. We produce across a wide range from personalized busts to monumental statues and Atatürk statues.

What Should Be Considered When Choosing Sculpture Manufacturing Companies?

Sculpture order placing requires evaluating the company correctly beforehand to avoid disappointment. First of all, it is necessary to look at the projects previously completed by the company and their references. Real customer feedback provides the most honest information about the company's understanding of quality and customer satisfaction. In addition, the quality of the materials used, the transparency of the production process and compliance with delivery times are also important criteria to consider. A good sculpture company provides detailed information before the order, keeps the customer informed throughout the process and delivers the product without any deficiencies. Rather than making a price-focused choice, keeping quality and reliability at the forefront will be a much better decision in the long run.

About Our Company Heykel.org

With years of accumulated experience and dozens of completed projects, we firmly maintain our place among Turkey's reliable sculpture manufacturers. We produce at every scale and type,

primarily personalized busts, Ataturk statues, monumental figures and decorative sculpture works. Experienced masters in our workshop approach every project with the same meticulousness and care. We keep our customers informed throughout the entire process from the order stage to delivery, standing by their side as a transparent and reliable business partner. Our goal is not just to deliver a product but to provide our customers with meaningful, lasting and impressive works.

How Does Our Production Process Work?

Every sculpture project begins with a detailed preliminary meeting with the customer. In the first stage, who or what the sculpture will belong to, its size, material preference and intended use are determined. Reference photographs and visuals are then collected and a preliminary design is prepared in a graphic environment. After customer approval, the process moves to the skeleton installation stage; a sturdy internal structure is created with metal wire and rods. In the third stage, clay work begins. The clay shaped by the master's hands gradually reveals all the details of the sculpture. After the clay work is completed, the mold is taken and casting is done in the selected material. In the final stage, surface treatments and patina coating are applied and the sculpture is made ready for delivery. The customer is informed at every stage throughout this entire process and revisions are made when necessary.

Materials and Coating Options We Use

We prefer high-quality fiberglass and polyester materials in our productions. Fiberglass is our most preferred material with its lightweight structure, long life and outdoor durability. Thanks to its structure that is resistant to moisture, frost and UV rays, it can be used outdoors for decades without any problems. Polyester offers an economical and quality alternative for indoor sculptures. At the surface coating stage, bronze, copper, silver and gold patina options are offered. Bronze patina is the most preferred coating and gives the sculpture a deep and prestigious appearance. All coatings are protected with durable varnishes and maintain their vibrancy for many years. Stone powder, resin or composite material alternatives can also be considered in line with special requests.

What Types of Sculptures Do We Produce?

Our production range covers a very wide area. Personalized busts are among our most preferred products by families and institutions who want to permanently preserve the memory of their loved ones. Ataturk busts and full-body Ataturk statues are among the indispensable choices for schools, municipalities and official institutions. Monumental figures and square statues are works that strengthen the identity of cities and leave lasting impressions. Decorative sculpture works add aesthetic value to private spaces, gardens and workplaces. We have the equipment, experience and creativity to meet every kind of sculpture request.

Who Can Place an Order?

Placing a sculpture order requires no specific institution or status. We serve everyone from individual customers to large-scale public institutions. Families who want to keep the memory of a loved one alive, companies who want to honor a retiring manager, municipalities who want to have a monument built in the city square and all kinds of organizations that want to strengthen their institutional identity are among our customers. Regardless of the size of the project, we approach every order with the same care and professionalism.

Delivery Time and Shipping

Production is completed within an average of 30 to 60 days after the order is confirmed. This period may vary depending on the size, complexity and material type of the sculpture. Every sculpture delivered is packaged with special protective packaging materials to prevent any damage during transportation. In addition to domestic delivery, international delivery is also available. For international orders, shipping time and cost are determined separately according to the country of delivery and the size of the sculpture.

What Should You Do to Place an Order?

Placing a sculpture order is quite easy and fast. All you need to do is fill out the contact form on our page. Our team will contact you as soon as possible and determine the details of your project together. Who the sculpture will belong to, what size you want, and your material and coating preferences are clarified during the meeting. A price quote is then presented and production begins after the advance payment is received. You will be informed at every stage throughout the process and can request revisions if necessary. If you want to work with a quality, reliable sculpture company that delivers on time, you are at the right address.
